What is NCyTE?

The National Cybersecurity Training and Education Center (NCyTE) at Whatcom Community College is a grant-funded Advanced Technological Education (ATE) National Center. NCyTE's mission is to advance cybersecurity education in the U.S. by investing in technological innovation, resources, professional development and tools to support faculty, community colleges and the workforce pipeline of tomorrow.

Why Should You Join NCyTE?

- FREE membership for accredited higher education institutions and high schools
- Networking opportunities with more than 300 cybersecurity faculty in 45 states
- Travel stipends for professional development at cybersecurity education conferences
- Free webinars, downloadable curriculum, workshops, and more
- A world-class repository of resources, support, and professional development
- Cybersecurity modules designed for easy integration with community college computer science programs
- Curriculum and resources for critical infrastructure cybersecurity
- Mentorship for colleges and universities that want to apply for Center of Academic Excellence (CAE) designation
- Resources to energize students and get your school started with competitions like the National Cyber League (NCL) and the National Collegiate Cyber Defense Competition (CCDC)

NCyTE is funded by the National Science Foundation by Grant #1500375, Grant #1800589 and Grant #1902329. It is administered by Whatcom Community College in Bellingham, WA.
