## Completion Rate Calculator

Follow the steps below to calculate an *estimated completion rate*\* for your school. This number will help you gauge your real-time school sign-up rate and help you stay on track to meet your goals.

1. Look up your number of complete applications in the MS Toolbox. Put this number in Box 1 below.
2. In Box 2, enter the number of FRPL eligible students for a specific grade using the Free/Reduced-Price Meals Demographic Report found in the Attributes and Program tab in CEDARS.
3. In Box 3, divide the number of complete applications by the number of eligible students. This is your current completion rate.

Class of \_\_\_\_\_

<b>1</b>		<b>2</b>		<b>3</b>
<input type="text"/>	÷	<input type="text"/>	=	<input type="text"/>
Number of <b>complete</b> applications		Current number of FRPL eligible students for a specific grade (as defined above)		Current completion rate

\*If you are estimating 8th grade completion rates, you may want to account for students who were eligible in 7th grade.
