

College and Career Compass Student Response Plan Description

Student Response Plan

The Compass tool will share contact information of prospective students who are interested in educational programs and career pathways at your institution.

In this section of Survey 1, describe your campus plan for responding to students connected through the Compass tool. Effective plans will be:

- Timely
- Personalized and tailored to student's characteristics and needs
- Supportive, including admissions and enrollment advising

Survey 1 also requests contact information for the campus staff who will respond to student leads and who will share lead outcomes with WSAC on a quarterly or semester basis.

Submit your Student Response Plan online as part of Survey 1:
